

General Terms and Conditions of Business of CG&GQM, LLC for professional services ("pro services")

§ 1 Terms and Conditions: Scope

These terms and conditions apply to the professional services we offer in connection with our modular quality management and company management software (QMSpot) and are only intended for entrepreneurs.

§ 2 Subject matter of the contract

2.1 We provide the following professional services related to our modular quality management and enterprise management software (QMSpot) to the extent agreed with the customer against payment of the agreed fee. The following services are included:

- We shall provide the predetermined QM Spot modules as a web application for use by the customer as "Software as a Service (SaaS)" for the number of users agreed upon, cf. also § 3; using an Internet browser, the customer will call up a website named by us, via which the customer's registered users can log in, call up and use QM Spot. The duration of use depends on the content of the contract (fixed contract term or indefinite use);
- We provide the customer with storage space on a cloud server in the European Union. The data generated during or through the use of QMSpot are stored there. We back up the stored data as follows: Daily, monthly and annual backups are created. The daily backups are kept for 29 days, the monthly backups are kept for 11 months. Annual backups are kept until the end of the contract term.
- We update the QMSpot software and make it available to the customer for use to the agreed extent after internal release. We check automatically reported errors in the software. We are also entitled to forward these messages to software service providers for analysis. Whenever this is

intended, we will inform the client in advance. The aim is to use these data to avoid future identical errors and to create an updated software that we can make available to the customer.

- We provide support for QMSpot and the hardware leased to the customer, cf. § 4. Under other circumstances, § 7 applies..
- This being the content of the agreement:
 - We provide the customer with the agreed rental item (hardware, sensors or similar devices, hereinafter collectively referred to as "hardware") on a permanent basis (sale) or on a rental basis;

- We support the customer with additional services ("onboarding") when the customer starts using QMSpot e.g. by setting up the QMSpot software (user installation, access authorization or similar items), training, instructions, setting up the hardware etc.; this is done online / via video conference tool or remote maintenance.

2.2 The services shall be provided at the registered office of CG&GQM, LLC. The services are provided by remote maintenance. If an on-site service is absolutely necessary or requested by the customer, this will be based on a separate order placed by the customer.

2.3 If necessary, these services will also be provided by third party service providers. Should this be intended, we will inform the client in advance.

2.4 A user manual will not be made available. Instead, the customer will receive access to the QMSpot online help center, where the customer can view videos, instructions and FAQs about QMSpot.

§ 3 Provision of QMSpot, storage space, connection, usage rights

3.1 We shall keep the QMSpot software ready for use by the customer on cloud

shall be available to the Customer Monday to Friday between 7 a.m. and 6 p.m. (CET/CEST), provided that no urgent maintenance work is to be carried out. Normal maintenance work is carried out from 9pm (CEST) - 6am (CEST). We will inform the client's admin about any upcoming maintenance work.

3.2 We provide the customer with the access data for his admin accounts with an initial password. The customer can use this to create the agreed number of user accounts in QMSpot himself. The customer shall immediately replace the initial passwords with passwords known only to him. This is possible through the backend of the software. If desired, we can support the customer in setting up the application. This support costs a separate fee.

3.3 We shall provide storage space on the server to the agreed extent as of the agreed date. We back up the web application and the application data stored by the customer on the provided storage space on a regular basis, at least every calendar day, cf. § 2. The customer is responsible for compliance with retention periods under commercial and tax laws.

The transfer point for QMSpot and the application data is the router output of the provider's data center. The customer is responsible for the establishment and maintenance of the internet/telecommunication connection between the customer and the transfer point.

3.4 Upon commencement of the contract, we grant the customer simple rights of use to QMSpot for the agreed number of Named Users during the term of the contract ("license").

The identity of the Named User shall be recorded by the Client. A Named User may not be used by several actual users. The customer is entitled to exchange Named Users if and when the previous user no longer uses the QMSpot software for the customer permanently or temporarily (at least 1 week). The customer may only use the application for his own business activities and through his own personnel. If the number of users increases, the customer shall indicate this so that activation and invoicing can take place in accordance with the valid price list.

3.5 The customer has no right to install the QMSpot software himself. He shall not receive a duplicate (copy) of the software. The software shall not be transferred / handed over permanently, neither in the object code nor in the source code.

§ 4 Support, other services, changes to the software

4.1 As part of the support, the customer receives access to the QMSpot online help center. Here the customer can use videos, instructions and FAQs on QMSpot as well as contact support. Service is provided Mondays to Fridays, excluding national holidays, between 8 a.m. - 4 p.m. (EST), hereinafter also referred to as "Service Hours".

4.2 If and insofar as the provision of a new or modified program version requires an amendment in the functionalities of QMSpot, supported work processes of the customer and/or restrictions in the usability of previously generated data, we will inform the customer in text form at least six weeks before such a change takes effect. If the customer does not object to the amendment in text form within a period of two weeks from receipt of the amendment notification, the amendment shall become part of the contract.

The provider shall grant the customer the same rights to new program versions as those for the previous program version. If the provider is not in a position to do so, e.g. because a third party manufacturer whose work results were previously used has changed the terms of use, the provider shall inform the customer of this and submit proposals for solutions. The provider is not obliged to procure new licenses free of charge in order to enable the customers to use them analogously to the previous conditions.

§ 5 Hardware

5.1 If a hardware purchase and / or hardware rental is agreed upon, we deliver the agreed hardware to the customer. A setup / connection of the hardware to QMSpot is subject to order.

5.2 Insofar as we sell the hardware to the customer, the guarantee period against defects in the hardware shall be 1 year. Clause 7.1 shall apply accordingly. If we are unable to remotely troubleshoot the hardware reported as defective, the customer shall send it to us for error checking.

5.3 Should we lease the hardware, we shall, at our own discretion, exchange the hardware for a new device of the same type, insofar as this is necessary to maintain the previous

purpose of use. This is particularly the case if the manufacturer no longer updates the operating software.

5.4. The customer shall treat the rented hardware with care and protect it from damage. The customer shall follow the manufacturer's maintenance, care and operating instructions, in particular the instructions contained in the operating manual and documentation provided, to the best of his ability. Markings on the hardware, in particular signs, numbers or inscriptions, may not be removed, changed or made unrecognizable. Installing the hardware at a location other than the one specified in the contract requires our prior consent. We will refuse this only if there are reasons that make the implementation unreasonable for us. We may require that any transport and reinstallation be carried out by qualified persons only. The customer shall bear the expenses and consequential costs associated with a change of location as well as any additional costs for maintenance and support that may have arisen as a result thereof.

§ 6 Duties and obligations of the customer

The customer will fulfill all duties and obligations that are necessary or customary for the execution of the contract. In particular, he will

- keep secret the usage and access authorizations assigned to him or to users, along with any identification and authentication safeguards,

protecting them from access by third parties and not passing them on to unauthorized users. This data shall be protected by appropriate and customary measures. The Customer shall inform the Provider immediately if there is any suspicion that the access data and/or passwords may have become known to unauthorized persons;

- create the agreed access requirements;
- provide us with remote access to the leased and / or sold hardware and

QM Spot in order to facilitate updating the respective software and, if

necessary, system settings;

- grant us access to the IT system so that we can provide of our services. If

access takes place without simultaneous presence or control (a customer employee accompanies the remote maintenance), we shall inform the customer by e-mail of the measures we have taken and subsequently report, also by e-mail, on their completion.

- provide us with access to the leased and / or sold hardware via remote maintenance in case the customer reports a hardware failure.
- not grant any unauthorized third party access to QMSpot;
- use the QMSpot checklists, QMSpot drawings, QMSpot tables only as

intended; the production of duplicates / copies of these integrated works is only permitted for the documentation and proof of the hygiene measures. Passing on to third parties outside of this purpose of use is not permitted.

- if and to the extent that the technical possibility to do so is made available to him by mutual agreement, regularly back up the application data stored on the server by means of downloading; this shall not affect our obligation to back up data, pursuant to § 1.
- send us hardware reported as defective if the fault cannot be clarified via remote maintenance;

§ 7 Malfunctions, claims for defects, liability

7.1 Reporting faults and defects, testing

The customer shall report to us any malfunctions occurring in the services specified in § 1. This is possible through our ticket system, chat, e-mail, support form or a callback service, cf. our online help center.

The customer shall give us the opportunity to inspect and rectify the fault. We may choose how to rectify the fault and shall endeavor to rectify it within a reasonable period of time. In doing so, the effects of the malfunction and the urgency indicated by the affected customer shall be taken into account. If the disruption cannot be eliminated with reasonable effort, a workaround will be examined and implemented if this is possible with reasonable effort and is reasonable for the customer.

Should third parties be involved in the provision of services, we will also request them to check and, if necessary, rectify the reported fault.

We will inform the customer electronically or by telephone about necessary measures.

7.2 Storage space, telecommunication connection

With regard to the provision of storage space on the server, we do not assume any strict liability for initial defects of the server. The same applies to initial defects of QMSpot and the leased hardware.

We assume only limited liability for interruptions, malfunction or other harmful incidents caused by our telecommunication services or those of third parties for which we are liable. Our liability goes only as far as the recourse available to us against the telecommunications service provider in question. We are not liable for the functionality of the internet connections to the provided servers, in case of power failures and in case of failures of servers that are not within our influence. The above limitations and exclusions shall not apply to damage caused by us through gross negligence or intent or for which we have assumed a guarantee covering the breach of duty.

7.3.1 There shall be no reduction of the agreed remuneration attributable to the use of the software in the event of an initial or subsequent defect in the software. The same shall apply to defects in the leased hardware.

7.3.2 The customer cannot make a claim for damages caused by a defect in the software and the leased hardware. This does not apply,

- for any culpable injury to life, body or health,
- in the event of intent or gross negligence on the part of the

provider,

- if we have fraudulently concealed the defect / malfunction,
- if we have assumed a guarantee for the performance and the defect

is covered by the guarantee;

7.3.3 The customer's claims for rectification of faults/defects, supplementary performance, reimbursement of futile expenses and compensation for damages due to a defect shall become statute-barred after 12 months. This does not apply,

- for any culpable injury to life, body or health,
- in the event of intent or gross negligence on the part of the

provider,

- if we have fraudulently concealed the defect,
- if we have assumed a guarantee for the performance and the defect

is covered by the guarantee;

7.3.4 Termination by the customer due to failure to provide use in accordance with the contract is only permissible if we have been given sufficient opportunity to remedy the defect and this has failed. The rectification of defects shall only be deemed to have failed if the rectification is impossible, if we refuse to rectify the defect or if it is unreasonably delayed, if there are reasonable doubts as to the prospects of success or if the customer cannot reasonably be expected to wait further for other reasons.

7.3.5 If the customer makes changes to the hardware or has changes made to the hardware without our consent, the customer shall have no rights related to defects in the hardware unless the customer can prove that the changes do not cause us unreasonable inconvenience to analyze and eliminate the defect. The rights of the customer due to defects remain valid when the customer is entitled to make changes, in particular within the scope of exercising the right of self-remedy and the changes have been carried out professionally and documented in a comprehensible manner.

7. 4 Data backup deficiencies

The limitation period for defects in data backup is 2 years. This does not apply if we have fraudulently concealed the defect.

§ 8 Delays

We shall not be in default if unforeseen obstacles occur, e.g. operational disruptions, insofar as such obstacles demonstrably have a significant influence on the fulfillment of the contract and are not attributable to us. This shall also apply if such circumstances arise with our subcontractors. Dates affected by such circumstances shall be postponed appropriately in accordance with the duration of related measures and obstacles. We shall not be responsible for the aforementioned circumstances even if they arise during an already existing delay.

An unforeseen obstacle can also be a pandemic and / or new disturbances caused by a pandemic already known / prevailing at the time of the conclusion of the contract. The effects of a pandemic may also constitute unforeseen obstacles within the interpretation of this paragraph, e.g. quarantine obligations on the part of our employees, unforeseen long-term illnesses, absences due to illness and / or delays in the provision of services due to home office work or other circumstances made more difficult by the pandemic over which we have no control, e.g. contact bans, cancellation of personal meeting appointments / workshops, release of employees for childcare due to unavailability of kindergartens, schools and other childcare facilities. We will inform the customer

of any obstacles that occur and their likely effects and submit a proposal for a solution.

§ 9 Fees, price increases, changes

9.1 The remuneration for the services to be rendered by us will be according to the agreement reached. The named monthly fees are due on a monthly basis starting from the moment the access data to QMSpot are made available. They are to be paid along with the appropriate taxes in the respective statutory amount. The purchase price of the hardware is to be paid upon delivery.

The remuneration will be due in advance on the third last working day of the respective preceding calendar month.

9.2 If we provide onboarding services subject to remuneration as agreed, the remuneration agreed for this shall be due upon provision of the service. If the service is rendered in part or successively, the partial service rendered shall be due for payment when it is rendered.

9.3 We are entitled to increase the fee for current services (use of QMSpot and modules, data storage, support, hardware rental) for the first time after the expiration of 12 months from the start of the contract, with a 6-week notice in writing at the beginning of the month

that follows. The customer has the right to terminate the contractual relationship within a period of 1 month after receipt of the written notice regarding the price increase.

9.4 We provide other services on a time and material basis or at a flat rate according to our current price list.

9.5 If the number of price-forming factors (module selection, number of users) changes, the remuneration will be adjusted pro rata temporis.

9.6 If the customer requests the provision of a service on site or if this becomes necessary for other reasons, we will try to comply with this. We charge travel costs of 0,99 € / km plus out-of-pocket expenses, overnight stay or train/flight ticket 2nd class.

§ 10 Liability

In the absence of any other contractual liability agreement, the following provisions shall apply to all statutory and contractual claims for damages, indemnification and reimbursement of expenses of the customer:

If we violate an obligation due to slight negligence, our liability shall be limited to 10 times the annual fee agreed in accordance with § 9. Deviating from this:

a) If this 10-fold annual remuneration is less than \$30,000.00 our liability is limited to \$60,000.00.

b) If this 10-fold annual remuneration amounts to \$30,000.00 or more and less than \$100,000.00, our liability is limited to \$100,000.00.

§ 11 Terms of contract, termination rights, export of data, return of hardware, compensation for damages

11.1 If we have agreed a fixed contract term with the customer, the contract shall be extended by the period of the initial term if neither contracting party has duly terminated the contract with a notice period of 3 months. Sentence 1 shall apply accordingly to the extension period.

If no fixed contract term has been agreed on, the contract shall run for an indefinite period. This can then be terminated by either contracting party with a notice period of 1 month to the end of the month.

11.2 The right to extraordinary termination remains unaffected.

11.3 The termination must be in writing.

11.4 Access to QMSpot shall be deactivated upon termination of the contract. Likewise, the storage space provided is no longer accessible to the customer upon termination of the contract. The data stored there by the customer during the term of the contract will be deleted 1 month after the end of the contract. The apps stored on the end devices can no longer be used after termination of the contract. During the term of the contract, we will enable you to download, in a common data format, the data stored on the storage space made accessible to

you. There shall be no further claims to the transfer of all application data to a permanently readable mobile and audit-proof data carrier or similar device.

11.5 Upon termination of the contract, the leased hardware shall be returned to us in proper condition. All provided manuals and documentation must also be returned. At the time of returning the hardware, a protocol will be drawn up, in which any existing damage, incompleteness and defects of the hardware will be noted down.

11.6 In case of damage or missing parts of the hardware the following applies:

- If the rented hardware is damaged while in possession of the customer, we are entitled to reimbursement of the repair costs. In addition, the customer is obligated to compensate us for any loss of rental income incurred during the repair period. If repair is not possible, takes a long time or is not feasible, we are entitled to compensation in money (difference in the value of the item in undamaged condition compared to the damaged condition). Contractual wear and tear does not translate to damage to the item.

- in case of missing parts: The customer will reimburse the cost of obtaining new missing parts, taking into account the age of the returned rental item. In addition, the customer shall reimburse us for the loss of rental until receipt of the replacement part and its installation.

Alternatively, we are entitled to the applicable statutory claims.

Unless otherwise agreed in the rental agreement, the provider shall bear the costs of dismantling, packing and return transport of the rental items.

§ 12 Order processing

Owing to the processing of personal data in connection with the execution of the contract, the contracting parties shall conclude a separate order processing agreement.

§ 13 Applicable law, place of jurisdiction, miscellaneous

The laws of the State of Florida apply. Should individual provisions of this contract become invalid or unenforceable, the validity of the remaining provisions shall remain unaffected. There are no ancillary provisions outside this contract and its annexes. Amendments or supplements to this contract and its appendices must be made in writing to be effective.

CG&GQM, LLC

This also applies to the waiver of the requirement to provide all documentation in text form.

If, in the practical application of this contract, gaps arise which the contracting parties have not provided for, or if the invalidity of a provision is established in a legally binding manner or by both contracting parties in agreement, they undertake to fill or replace this gap or invalid provision in a factual and appropriate manner oriented to the economic purpose of the contract.
